**DECISION ON AN APPLICATION BY SKYCITY CASINO MANAGEMENT LIMITED
FOR APPROVAL OF NEW GAME MIXES FOR THE AUCKLAND CASINO**

Introduction

1. SKYCITY Casino Management Limited ("**SCML**") applied to the Commission, under condition 9 of its operator's licence, for approval of five new game mixes, T-X for the Auckland casino.
2. The relevant licence condition is as follows:

SCML operator's licence (Auckland)

9. The Licence Holder may operate on casino gaming tables the game types and game mix(es) specified in Annex A attached to this Licence. The Licence Holder shall obtain the prior approval of the Commission for any change to the game types and/or game mixes specified.

Submissions by SCML

3. SCML submitted, in summary, as follows:
 - (a) The impact of the proposed new game mixes on player spaces is set out in a table below. For those games where the maximum number of player positions is not fixed by game rules, it has applied a theoretical maximum number of positions as a guide for the Commission. These theoretical maximums have been used in previous applications. Based on these figures, each of the new game mixes has fewer player spaces than the regulatory benchmark, game mix A.

- (b) A comparison on rates of play is also set out in the table below. The figures used in this table were derived from a trial carried out by SKYCITY and considered by the Commission in decision GC17/10
- (c) Unlike previous applications it has not sought to specify a notional hourly rate of play for each of the games. Following an assessment of the Commission's comments in decision GC17/10 it has presented the trial data in its raw form without extrapolation, to provide for a more appropriate comparison.
- (d) The notional opportunities associated with each of the proposed new game mixes is significantly less than that associated with game mix A.
- (e) It is satisfied that the new game mixes will not increase casino gambling opportunities.
- (f) Subject to the Commission's approval of the new game mixes, it will provide the Commission and the DIA inspectorate with a minimum of five days notice before adopting any one of them.
- (g) The player spaces and rate of play for the relevant game mixes are as follows:

Game Mix	Player Spaces	Rate of Play
A	3,909	68,363
T	3,855	61,611
U	3,855	61,842
V	3,899	62,505
W	3,899	62,736
X	3,899	62,883

The Secretary's submissions

4. The Secretary submitted that SCML's calculations appear accurate, and he had no regulatory concerns regarding the new game mixes.

Analysis

5. SCML applied for approval of five new game mixes, T-X, and relied upon game speed data it presented to the Commission in its application lead to decision GC17/10.
6. The Commission's approach when considering whether a proposal will increase opportunities for casino gambling is to compare what is proposed with the approved game mix that provides the greatest opportunities for casino gambling, and which the Commission regards as the benchmark. The Commission compared game mixes T, U,

V, W and X with game mix A and was satisfied that they will not increase opportunities for casino gambling.

- 7. The Commission's comparison was an overall commonsense comparison in the round.

Decision of the Commission

- 8. The Commission approved the new Annex A (**attached**), which incorporates five new game mixes, T-X, under condition 9 of SCML's operator's licence for the Auckland casino.
